# Cosy Toes

## Foot, Leg and Body Warmer

The New Cosy Toes has been designed to offer convenient protection from the cold without getting caught around the wheelchair's wheels or leaving a draught behind the client's legs.

Some clients find it difficult to maintain body temperature or just need a little extra warmth in winter. The New Cosy Toes is designed to help provide additional warmth. Available with sheepskin or fleece liner.

Cosy Toes is compatible with most wheelchairs and seating systems. Please ask for details.

## Key features:

### Custom made to meet every need

Cosy Toes is custom made for maximum comfort and fit.

### Helps maintain body temperature

Sitting still for a long period of time can make staying warm difficult. Cosy Toes helps maintain body temperature, great for those who need a little extra warmth.

### No more loose blankets

Cosy Toes is fitted to the individual's preferred seat position with elastic attachment meaning it cannot get wrapped around the wheelchair's wheels.

### Covers the front and back of the legs

By covering the front and back of the legs up to the seating system, Cosy Toes prevents a draught creeping in from under the seat keeping legs warm and dry.

### Available in a range of colours to match existing seating systems

Cosy Toes is available in a range of colours. Please contact us for details.

Cosy Toes can be folded down to cover either the whole body or legs and feet
