Flexi Seat Modular Seating System

The SOS Flexi Seat provides a cost-effective approach to the daily management of children who require postural support for their daily management and mobility.

This lightweight modular seating system provides effective midline control for children who require support to maintain postural stability.

On assessment there is a wide range of optional accessories available for use with the Flexi Seat to enable the seating system to be configured accurately for each individual child.

Key features:

Fully Adjustable

All Flexi Seat seating systems have the following adjustment:

- Seat depth adjustment
- Back rest height adjustment
- Hip width adjustment
- Trunk width adjustment
- Backrest to seat angle adjustment

Being fully adjustable enables the seating system to keep pace with growth and subsequent changes in posture and size.

Independent component positioning

Once the Back and Base have been positioned the other seating components can be adjusted independently to match any imbalance in the client's posture.

Backrest to seat - angle adjustment

Flexi seat features angle adjustment between the base and backrest to allow flexibility between base and backrest configuration when needed.

Available in 7 Different Colours

| SIZE | DIMENSIONS in inch (mm) | | | | | | | |
|--------|-------------------------|---------------|--------------|---------------|-----------------|---------------|--------------|---------------|
| | Seat Depth | | Hip Width | | Shoulder Height | | Trunk Width | |
