MoJo®

Tilt & Recline

Improved sitting tolerance and Relief from pressure sores by combining tilt in space with a backrest recline.

The MoJo Tilt and Recline (TR) wheelbase offers a more versatile range of adjustment than most seating systems.

The combination of tilt in space and backrest recline help prevent pressure sores and improve overall comfort. Shifting the client's centre of gravity can help manage conditions that affect digestion and respiration improving wellbeing, bringing additional benefits to both the client and carer.

MoJo TR is available in 3 different sizes: Mini, Midi and Maxi and can be configured with a fixed frame. This is useful for clients who do not require a Tilt in space facility. Compatible with modular seating systems only.

Designed for you

Prevents and relieves pressure sores

The combination of tilt in space and tilt and backrest recline allows the seat angle to be adjusted to prevent pressure build up.

Helps aid digestion and breathing

The seat can be adjusted so the client is at the optimum angle for breathing, swallowing and digestion.

Improves sitting tolerance

Backrest recline increases the range of seat adjustment, making sitting still for a long period more comfortable.

Suitable for all ages and sizes

MoJo TR is suitable for all ages and compatible with our custom moulded and modular seating systems.

Fully customisable

All SOS seating systems and wheelbases are made to order for each individual client. No matter how complex.

Reliable and robust design

SOS have been refining MoJo wheelbases for over 10 years. Today's version is one of the strongest and most reliable wheelbases available.

Quick-Lok for swapping seating systems

The SOS designed Quick-Lok makes it possible to swap seating systems easily, increasing the life span of the wheelbase.

Innovative features:

Height adjustable handles

Adjust independently to allow the carer to find their most comfortable position.

Quick-Lok interface

Switch seating systems easily, increasing wheelbase life span.

Easy to adjust armrests

Frame mounted armrests with height and width adjustment.

Adjustable handle rake

Handle rake can be set to suit the seating system used.

Footrests and footboxes

Available with a range of footboxes, footrests and sandals.

Rear wheel brakes

Reliable rear wheel brakes with easy operation and adjustment.

3 position rear wheel settings

3 position rear wheel setting for extra stability when required.

Suitable for transport

Improved pressure control & sitting tolerance

Backrest recline

Allows a passive range of movement in the hips, helping to distribute pressure and prevent pressure sores.

Transport at any angle

Front and rear transportation tie down points are frame mounted to allow the seat angle to be set to any angle during transport.

Tilt in space and fixed frame versions

Foot operated tilt in space facility makes seat angle adjustment easy for client comfort. Also available with a fixed angle frame.
